

### In the Claims

1. (Currently Amended) A method of stirring a solution comprising:  
contacting a selective binding substance immobilized on ~~the~~ a surface of a carrier with a solution containing an analyte substance reactive with the selective binding substance, ~~and~~  
mixing ~~the~~ fine particles or air bubbles into the solution ~~containing an analyte substance~~, and  
moving the fine particles or air bubbles without allowing contact thereof with the selective binding substance-immobilized surface.
2. (Currently Amended) The method ~~of stirring a solution~~ according to Claim 1, wherein ~~a the~~ carrier ~~in such~~ has a structure that the fine particles or air bubbles do not ~~become~~ come into in contact with the selective binding substance-immobilized surface carrier ~~is used~~.
3. (Currently Amended) The method ~~of stirring a solution~~ according to Claim 1, wherein ~~the~~ solution is in a container ~~for solution in such~~ having a structure that the fine particles or air bubble do not ~~become~~ come into in contact with the selective binding substance-immobilized surface ~~is used~~.
4. (Currently Amended) The method ~~of stirring a solution~~ according to Claim 1, wherein the carrier has convex-concave surface and the selective binding substance is immobilized on the top face of the convexes.
5. (Currently Amended) A method of stirring a solution comprising:  
contacting a selective binding substance immobilized on ~~the~~ a top face of convexes of a carrier with a solution containing an analyte substance reactive with the selective binding substance,  
mixing fine particles or air bubbles into the solution containing the analyte substance, and  
moving the fine particles or air bubbles.
6. (Currently Amended) The method ~~of stirring a solution~~ according to Claim 1 or 5, wherein the solution is stirred by movement of the fine particles.
7. (Currently Amended) The method ~~of stirring a solution~~ according to Claim 1 or 5, wherein the solution is in a container ~~for solution is used~~.
8. (Currently Amended) The method ~~of stirring a solution~~ according to Claim 7, wherein the solution is stirred by movement of the fine particles and ~~the~~ a minimum width of the fine particles is greater than ~~the~~ a minimum distance between the selective binding substance-immobilized surface and the container ~~for solution~~.

9. (Currently Amended) The method of ~~stirring a solution~~ according to Claim 1 or 5, wherein the solution is stirred by movement of the fine particles, the carrier has a convex-concave surface, the selective binding substance is immobilized on the top face of the convexes of the carrier, and the fine particles move in a concave area.
10. (Currently Amended) The method of ~~stirring a solution~~ according to Claim 1 or 5, wherein the ~~support~~ carrier has a fiat area and an a convex-concave area, the selective binding substance is immobilized on ~~the~~ a top face of the convexes of ~~a~~ the carrier, the height of the top face of the convexes is almost the same, and the difference in height between ~~the~~ a flat area and the top face of the convexes is 50  $\mu\text{m}$  or less.
11. (Currently Amended) The method of ~~stirring a solution~~ according to Claim 6, wherein the fine particles are forced to move by gravity, magnetic force, vibration of carrier, or a combination thereof.
12. (Currently Amended) The method of ~~stirring a solution~~ according to Claim 9, wherein ~~the~~ a maximum width of the fine particles is 10  $\mu\text{m}$  or more and less than the difference in height between the top face of convexes and the concave area.
13. (Currently Amended) The method of ~~stirring a solution~~ according to Claim 1 or 5, wherein the selective binding substance is a nucleic acid.
14. (Currently Amended) The method of ~~stirring a solution~~ according to Claim 1 or 5, wherein the selective binding substance reacts with the analyte substance.
